

## PROJECTS

**Location:** Kent

**Business Type:** Military Contractor

**Project:** Supplementary IT Support

Our Client is a leading international 'battlefield clearance' specialist, operating in over 45 countries, with an in-house IT Department maintaining their secure computing and communications infrastructure.

Their challenge was to find a competent IT services partner with appropriate security and confidentiality credentials to provide short notice response to assist in times of peak-workload and to ensure adequate cover for holiday and sickness, and our work with them has extended to provide Board Level policy and development advice.
