

PROJECTS

Location: Kent

Business Type: Independent Boys School

Project: ipCCTV

We were approached by one of the UK's top Boys Boarding Schools to provide ip-CCTV (Internet CCTV) equipment to cover their multi-million pound Leisure Centre ahead of its opening in 2008 by Olympic Gold medallist Sebastian Coe.

Since this time the system has been significantly expanded around the School's facilities to provide an additional layer of protection for their Pupils, Staff, Visitors and Facilities.

The system comprises a range of overt and covert digital Axis internet cameras, a mixture of fixed and Pan, Tilt and Zoom (PTZ) devices including day and night vision, Automatic Number Plate Recognition (ANPR) on approach roads, and with the video and audio streams being recorded and archived by professional Milestone software.
